

INSTITUTE OF CONSCIOUSNESS ENGINEERING

UX/UI Wireframe, Visual Hierarchy & Design System

Complete page architecture, component library, colour system, and animation map for the IOCE premium executive transformation website — prepared for review prior to development. No implementation code included; structure and content only.

Document version 1.0 · Prepared for stakeholder review · Source: IOCE Brand & Website Brief

Brand Positioning & Design Intent

IOCE integrates internationally accredited Clinical Hypnotherapy with Authentic Usui Reiki to consciously re-engineer the thoughts within the subconscious, creating meaningful and lasting transformations. The website is a **premium executive transformation brand** — not a wellness site, not a Reiki site, not a meditation site, not a therapy clinic. Every design decision is judged against one goal: generate qualified, trust-driven consultation bookings.

Brand personality

Embrace	Avoid
Premium, Elegant, Scientific, Professional, Human, Emotionally reassuring, Executive, Trustworthy	Mystical language, Spiritual clichés, Medical/clinical appearance, Alternative-healing appearance, Loud marketing, discount banners, urgency tactics

Design inspiration references

Apple · Notion · McKinsey · Tesla · Stripe · Linear · minimal luxury consulting firms — large whitespace, clean typography, elegant motion, restrained micro-interactions.

The single feeling every screen must produce

"IOCE is a premium, trustworthy and transformational experience." Every CTA invites — it never pushes.

Colour System

Swatch	Role	Value	Usage rule
	Background — Deep Navy	#0F172A	Primary canvas for every section; never used as text on light backgrounds
	Background — Raised	#131C33	Subtly lifted panels behind media before it loads
	Card surface	#16213D	All card components (testimonials, FAQ, pricing, promise)
	Primary text	#FFFFFF	Headlines and primary copy on navy
	Secondary text — Soft White	#CBD5E1	Body copy, descriptions
	Muted text	#8792A6	Meta labels, captions, timestamps
	Accent — Luxury Gold	#C9A227	CTAs, eyebrows, active states, dividers — used sparingly as the one "premium" signal
	Accent — Gold soft (gradient partner)	#E2C766	Primary button gradient only, never flat fills of large areas

Rule of thumb: gold never exceeds ~5% of any given viewport. It marks the single most important action or credential in view — if everything is gold, nothing is.

Surface & elevation

Subtle shadows only (soft, low-opacity, wide blur — no hard drop shadows). Rounded corners throughout (8–24px depending on component scale). Minimal glassmorphism reserved for the video-modal panel and sticky header only — not applied broadly.

Typography System

Apple-inspired system font stack (San Francisco on Apple devices, Segoe UI on Windows) — modern, elegant, highly legible at every size, no custom webfont dependency to keep load times fast.

Token	Size (responsive)	Weight	Usage
Hero headline	36px – 68px (fluid)	600	Hero section only — one per page
H1 / Page heading	32px – 52px	600	Standalone page titles (Thank You, Legal pages)
H2 / Section heading	26px – 40px	600	One per major section, sets the section's topic
H3 / Card & sub-heading	20px – 26px	600	Card titles, FAQ questions, roadmap milestones
Body large	17px – 20px	400	Section ledes / supporting statements directly under a heading
Body	16px	400	Standard paragraph copy
Small / Eyebrow	14px	600, uppercase, +0.14em tracking	Kicker labels above headings, meta text

Line height 1.6 for body copy, 1.15 for headings. Letter-spacing tightened slightly (-0.01em) on large headings for a refined, editorial feel matching the Apple/Linear reference set.

Component List

Component	Variants	Where used
Sticky Header	Transparent (top) → frosted navy (on scroll)	Every page
Button	Primary (gold gradient fill) · Secondary (outline) · Ghost (underline text link)	Every CTA sitewide
Card	Standard card · Bordered-dashed "example" card	Credentials, Who Can Benefit, Testimonials, Ecosystem, Consultation Options, Promise
Full-bleed Section Video	Background (muted/looping) · Modal (controls, audio)	Hero, Invisible Barrier, What is HypnoReiki, Why Choose IOCE, Testimonials, Watch-How-It-Works modal
Scroll-Reveal Wrapper	Fade+slide-up, optional stagger delay	Every heading, card, and content block
Accordion (FAQ item)	Single-open question/answer disclosure	FAQ section
Roadmap Milestone	Numbered step card with connector line	Journey section
Form Field	Text · Tel · Email · Textarea · Radio group · Topic chip	Consultation request form
Consultation Summary Row	Label/value pair	Booking Step 2
Info / Trust Box	Standard (gold-tinted) · Error (red-tinted)	Booking flow, confirmation messaging
Confirmation Checklist Row	Done (✓ gold) / Pending (—)	Thank-you page
Footer	Logo + tagline, quick links, copyright	Every page

Animation Map

Motion is restrained and purposeful — it should never be noticed as "animation," only felt as smoothness. All motion respects the visitor's OS-level reduced-motion preference.

Interaction	Effect	Trigger	Duration / easing
Heading & paragraph entrance	Fade + slide-up (24px)	Scrolls into view (~15% visible)	900ms, premium ease-out
Card grids	Fade + slide-up, staggered 80–120ms per card	Scrolls into view	900ms per card, staggered start
Header background	Transparent → frosted-glass navy	Page scroll > 24px	500ms
Buttons	Slight lift + gold glow on hover	Hover / focus	220ms
Cards	Lift (-6px) + border brightens + gold glow	Hover	500ms
FAQ accordion	Expand/collapse, "+" rotates to "x"	Click / keyboard Enter	220ms
Video modal	Backdrop fade + panel scale-in	"Watch How It Works" click	300ms
Booking flow steps	Cross-fade between Form → Summary → Payment	Step navigation	300ms

Explicitly avoided: parallax scroll-jacking, bouncy/elastic easing, auto-playing carousels, flashing or pulsing CTAs, confetti/celebratory overload on success states.

Page Architecture

Primary page (single scrolling landing page)

One continuous home page composed of 13 anchored sections, ending in an embedded 3-step booking flow. Sticky header persists throughout with a "Book Your Consultation" CTA that jumps to the booking anchor from anywhere on the page.

- 1. Hero
- 2. The Invisible Barrier
- 3. What is HypnoReiki?
- 4. Why Choose IOCE?
- 5. Your Journey Towards Lasting Transformation
- 6. Who Can Benefit?
- 7. Transformation Stories
- 8. IOCE Transformation Ecosystem
- 9. Consultation Options
- 10. Frequently Asked Questions
- 11. The IOCE Promise
- 12. Book Your Consultation (3-step flow: Form → Summary → Secure Payment)
- 13. Contact
- 14. Footer

Secondary pages

Page	Purpose
Thank You	Post-booking confirmation — payment/reservation status, email & WhatsApp confirmation status, next-step CTA
Privacy Policy	Data handling disclosure for the consultation form
Terms of Service	Booking, payment, cancellation/rescheduling terms
Disclaimer	Clarifies Hypnotherapy/Reiki are complementary, not a replacement for licensed medical/psychiatric care

Visitor emotional journey (maps directly onto section order)

No section may skip a stage or overload the visitor — each transition (Hero → Barrier → HypnoReiki → Why Choose Us → Journey → Who Benefits → Stories → Ecosystem → Options → FAQ → Promise → Booking) is a single deliberate step down this ladder.

01 · Hero

Emotional goal: Curiosity. **Visitor should feel:** "This is professional. This is different."

#	Element	Notes
1	Headline — "Re-Engineer the Thoughts Within Your Subconscious. Transform Your Life."	Largest text on the page; sets the entire value proposition
2	Subheadline	One sentence, clinical + Reiki integration explained plainly
3	Primary CTA — Book Your Consultation	Gold filled, jumps to booking anchor
4	Secondary CTA — Watch How It Works	Outline style, opens video modal (with sound)
5	Background cinematic video	Muted, looped, lazy-started; never competes with text legibility (scrim gradient darkens toward bottom)

02 · The Invisible Barrier / 03 · What is HypnoReiki?

02 — The Invisible Barrier

Emotional goal: Awareness → "This is exactly me." Full-bleed background video, single centred column of copy, no card grid — this section is a quiet pause, not a data section.

03 — What is HypnoReiki?

Emotional goal: Understanding. Plain-language explanation of the methodology — explicitly no mystical language. Same single-column layout as Section 2 for rhythm continuity.

Both sections deliberately restrained — a single reveal-in headline, a short paragraph, and a "continue" ghost link. No CTA to book yet: the visitor is still moving through Awareness → Understanding, not ready for Action.

04 · Why Choose IOCE?

Emotional goal: Trust. First data-dense section — credentials build authority after the emotional setup of Sections 2–3.

Card	Content
Credentials	29+ Years Professional Experience · 20+ Years Clinical Hypnotherapy & Usui Reiki · International Business Experience · Internationally Accredited Clinical Hypnotherapist · Authentic 17th Generation Usui Reiki Lineage
Every Session Is	Private · Confidential · Professional · Online Sessions · In-Person Sessions · Exclusive Sessions at Your Preferred Location

05 · Your Journey Towards Lasting Transformation

Emotional goal: Clarity. Animated roadmap — *not video* — four milestones in sequence, each revealing on scroll. First strong "Book Your Consultation" push after the credibility built in Section 4.

Milestones: **Book Consultation** → **Discover the Root Cause** → **Personalised HypnoReiki** → **Lasting Transformation**.
On mobile, the 4-column row collapses to a single vertical column with a connecting line down the left edge.

06 · Who Can Benefit? / 08 · IOCE Transformation Ecosystem

06 — Who Can Benefit?

12 categories total (Stress, Anxiety, Confidence, Emotional Healing, Limiting Beliefs, Peak Performance, Relationships, Leadership, Career Growth, Students, Professionals, Entrepreneurs) in a responsive 6→3→2 column grid. Uniform small cards — no single category is emphasised over another.

08 — IOCE Transformation Ecosystem

Four pillars presented as elegant infographic cards: Personal Transformation, Learning, Community, Corporate Transformation — positions IOCE as a full ecosystem, not a single service.

07 · Transformation Stories

Emotional goal: Proof. Video testimonials, click-to-play (never autoplay with sound) — this is the section where visitor scepticism should convert to belief.

Card element	Purpose
Video thumbnail (click-to-play, native controls)	Face + voice = highest trust signal on the page
Name	Personalises the story
Location	Grounds the testimonial in reality (not a stock quote)
Outcome line	One sentence, concrete result — no vague claims

09 · Consultation Options / 10 · FAQ / 11 · The IOCE Promise

09 — Consultation Options

Online · Private In-Person · Exclusive Sessions at Your Preferred Location — three equal-weight cards, no option visually favoured over another.

10 — Frequently Asked Questions

Single-open accordion, 10 questions, FAQPage structured data for search-result rich snippets.

11 — The IOCE Promise

Single centred trust card — the last reassurance before the booking flow. Deliberately calm and minimal after the denser FAQ section.

12 · Book Your Consultation — 3-Step Flow

This is the conversion moment. It must never feel like "checkout" — it should feel like the beginning of the client's transformation journey. One embedded card, three internal steps, no page reloads.

1. **Step 1 — Consultation Request Form:** Full Name, Mobile, Email, City, Country (optional), Preferred Mode (Online / Exclusive In-Person), "What would you like help with" (free text + example topic chips)
2. **Step 2 — Consultation Summary:** Read-only recap (Consultation Type, Fee, Duration, Mode, Preferred Time) + a reassurance box naming the practitioner and confirming confidentiality
3. **Step 3 — Secure Payment:** Single "Proceed to Secure Payment" button (not a payment form shown upfront) → Razorpay secure checkout overlay → trust badges (Secure Payment / SSL Protected / Razorpay Verified)
4. **Confirmation:** Redirect to Thank-You page — checklist of Payment, Reservation, Email, WhatsApp, Scheduling-link status

Step-by-step wireframe

STEP 1 — FORM

☐ Online

☐ In-person

Continue

STEP 2 — SUMMARY

Back

Pay

STEP 3 — PAYMENT

Proceed to Secure Payment

If Razorpay is not yet configured, Step 3 shows a graceful fallback message plus a "Confirm Consultation Request" action instead of a broken payment button — the visitor is never shown an error state with no path forward.

13 · Contact / Footer / Thank-You Page

13 — Contact

Footer

Logo + tagline, Privacy / Terms / Disclaimer links, centred copyright line. No newsletter signup or social feed — kept deliberately quiet.

Thank-You Page

Responsive Behaviour & Accessibility

Responsive collapse rules

Layout	Desktop (>1024px)	Tablet (640–1024px)	Mobile (<640px)
Card grids (Who Can Benefit, Ecosystem)	4–6 columns	2–3 columns	1 column
Roadmap milestones	4-column row with connector lines	2×2 grid	Single vertical column
Credentials / Session-quality cards	2 columns side by side	2 columns	Stacked
Header	Logo + tagline + CTA inline	Same, tagline may hide	Logo mark + CTA only
Video modal	16:9 landscape frame	16:9	9:16 portrait frame

Accessibility commitments (WCAG)

1. Skip-to-content link for keyboard users
2. Visible focus outline on every interactive element (gold, 2px, offset)
3. Background/looping videos never autoplay for visitors with reduced-motion enabled — they see a calm static frame instead
4. All decorative video marked hidden from assistive tech; testimonial videos remain fully accessible with native controls
5. Form fields carry visible labels and inline, announced error text — never colour-only error states
6. FAQ accordion is a native, fully keyboard-operable disclosure pattern
7. Colour pairings verified for AA contrast (white/soft-white text on navy; gold reserved for large text and interactive elements)

Video Asset Map

Reference for which video plays in which section, and how it behaves.

Section	Treatment	Audio
Hero — background loop	Muted, autoplay, looped, lazy-start	None (silent loop)
Hero — "Watch How It Works" modal	Click-to-open overlay, native controls	Full narration
The Invisible Barrier — background	Muted, autoplay, looped	None
What is HypnoReiki? — background	Muted, autoplay, looped	None
Why Choose IOCE? — background	Muted, autoplay, looped (contains on-screen credential text)	None
Transformation Stories ×4	Click-to-play thumbnail, native controls	Full testimonial audio

All video assets are lazy-loaded — nothing fetches until its section nears the viewport — keeping first-load fast and Core Web Vitals healthy despite a video-heavy page.
